Workshop Portal Guide

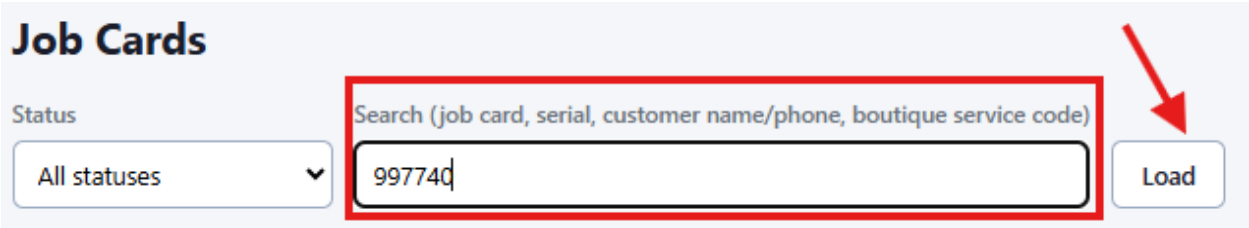

Login with your Username and Password:

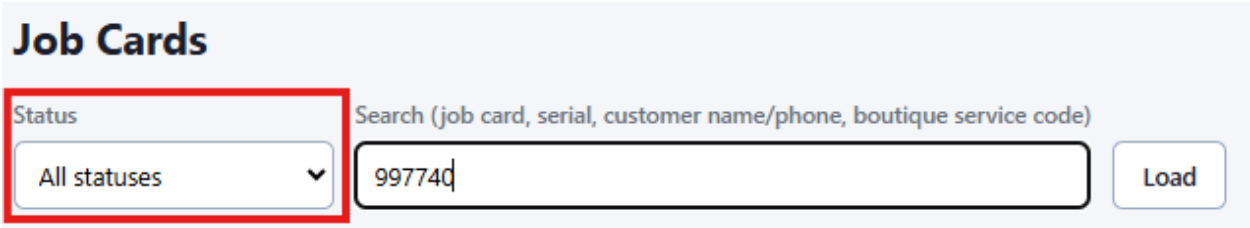

In the Workshop Tracker menu to your left you will have two options to view the job cards based on your privilege level:
Click on 1. ‘Job Cards’ option (if you are a part of the workshop team):

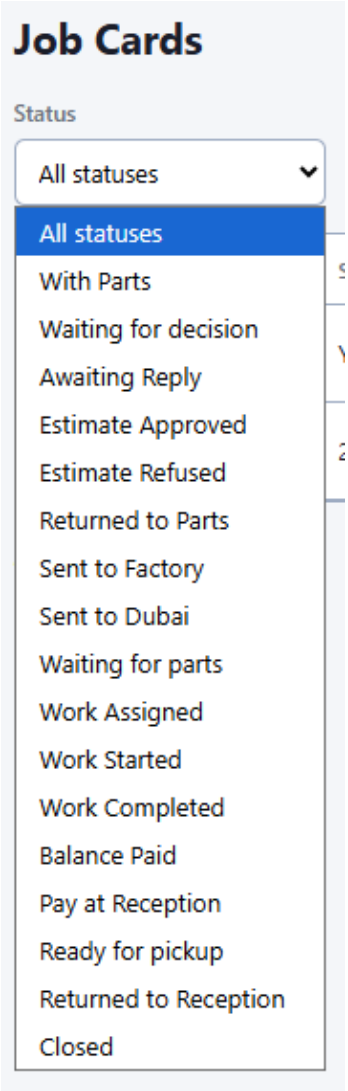

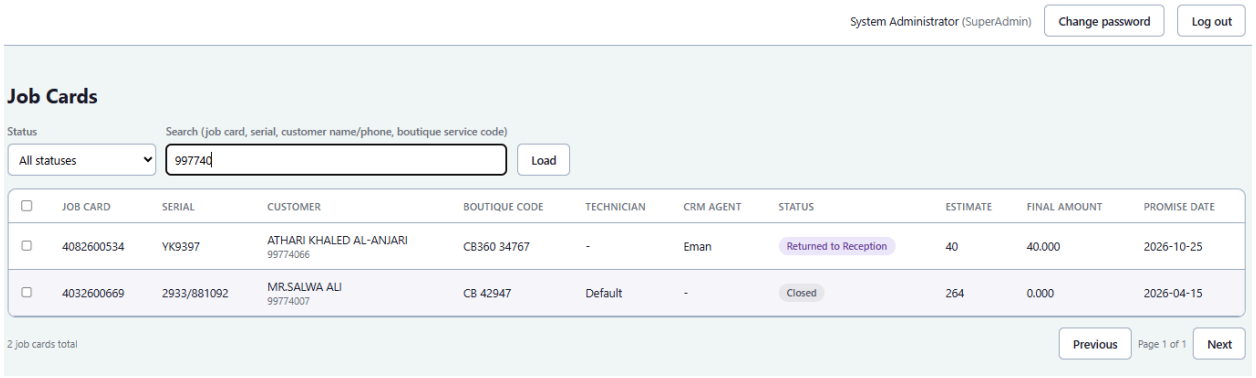

Enter in the search field the job card number, serial number, customer name/phone, boutique service code based on the job card information that you have and either press enter or click on the load button.

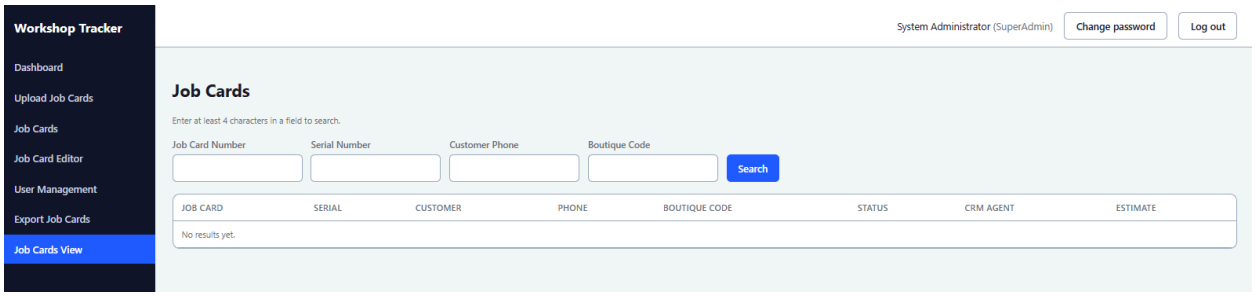

To the left of the search bar we have the status dropdown, set it to ‘All statuses’ to widen the search area or pick the appropriate status within the dropdown to narrow down the search.

Click on 2. ‘Job Cards View’ option (if you from an external team):

Here we provide the user 4 fields, where in at least one field should have greater than or equal to 4 character input in the search bar, then on pressing enter or clicking on the search bar the website will scan the jobcards to find the most relevant card to your search parameters.
