Final Result
Once you click on save, type in the signature name e.g. “test signature 1’ and click on the upload icon in black and then click on update settings to see the changes

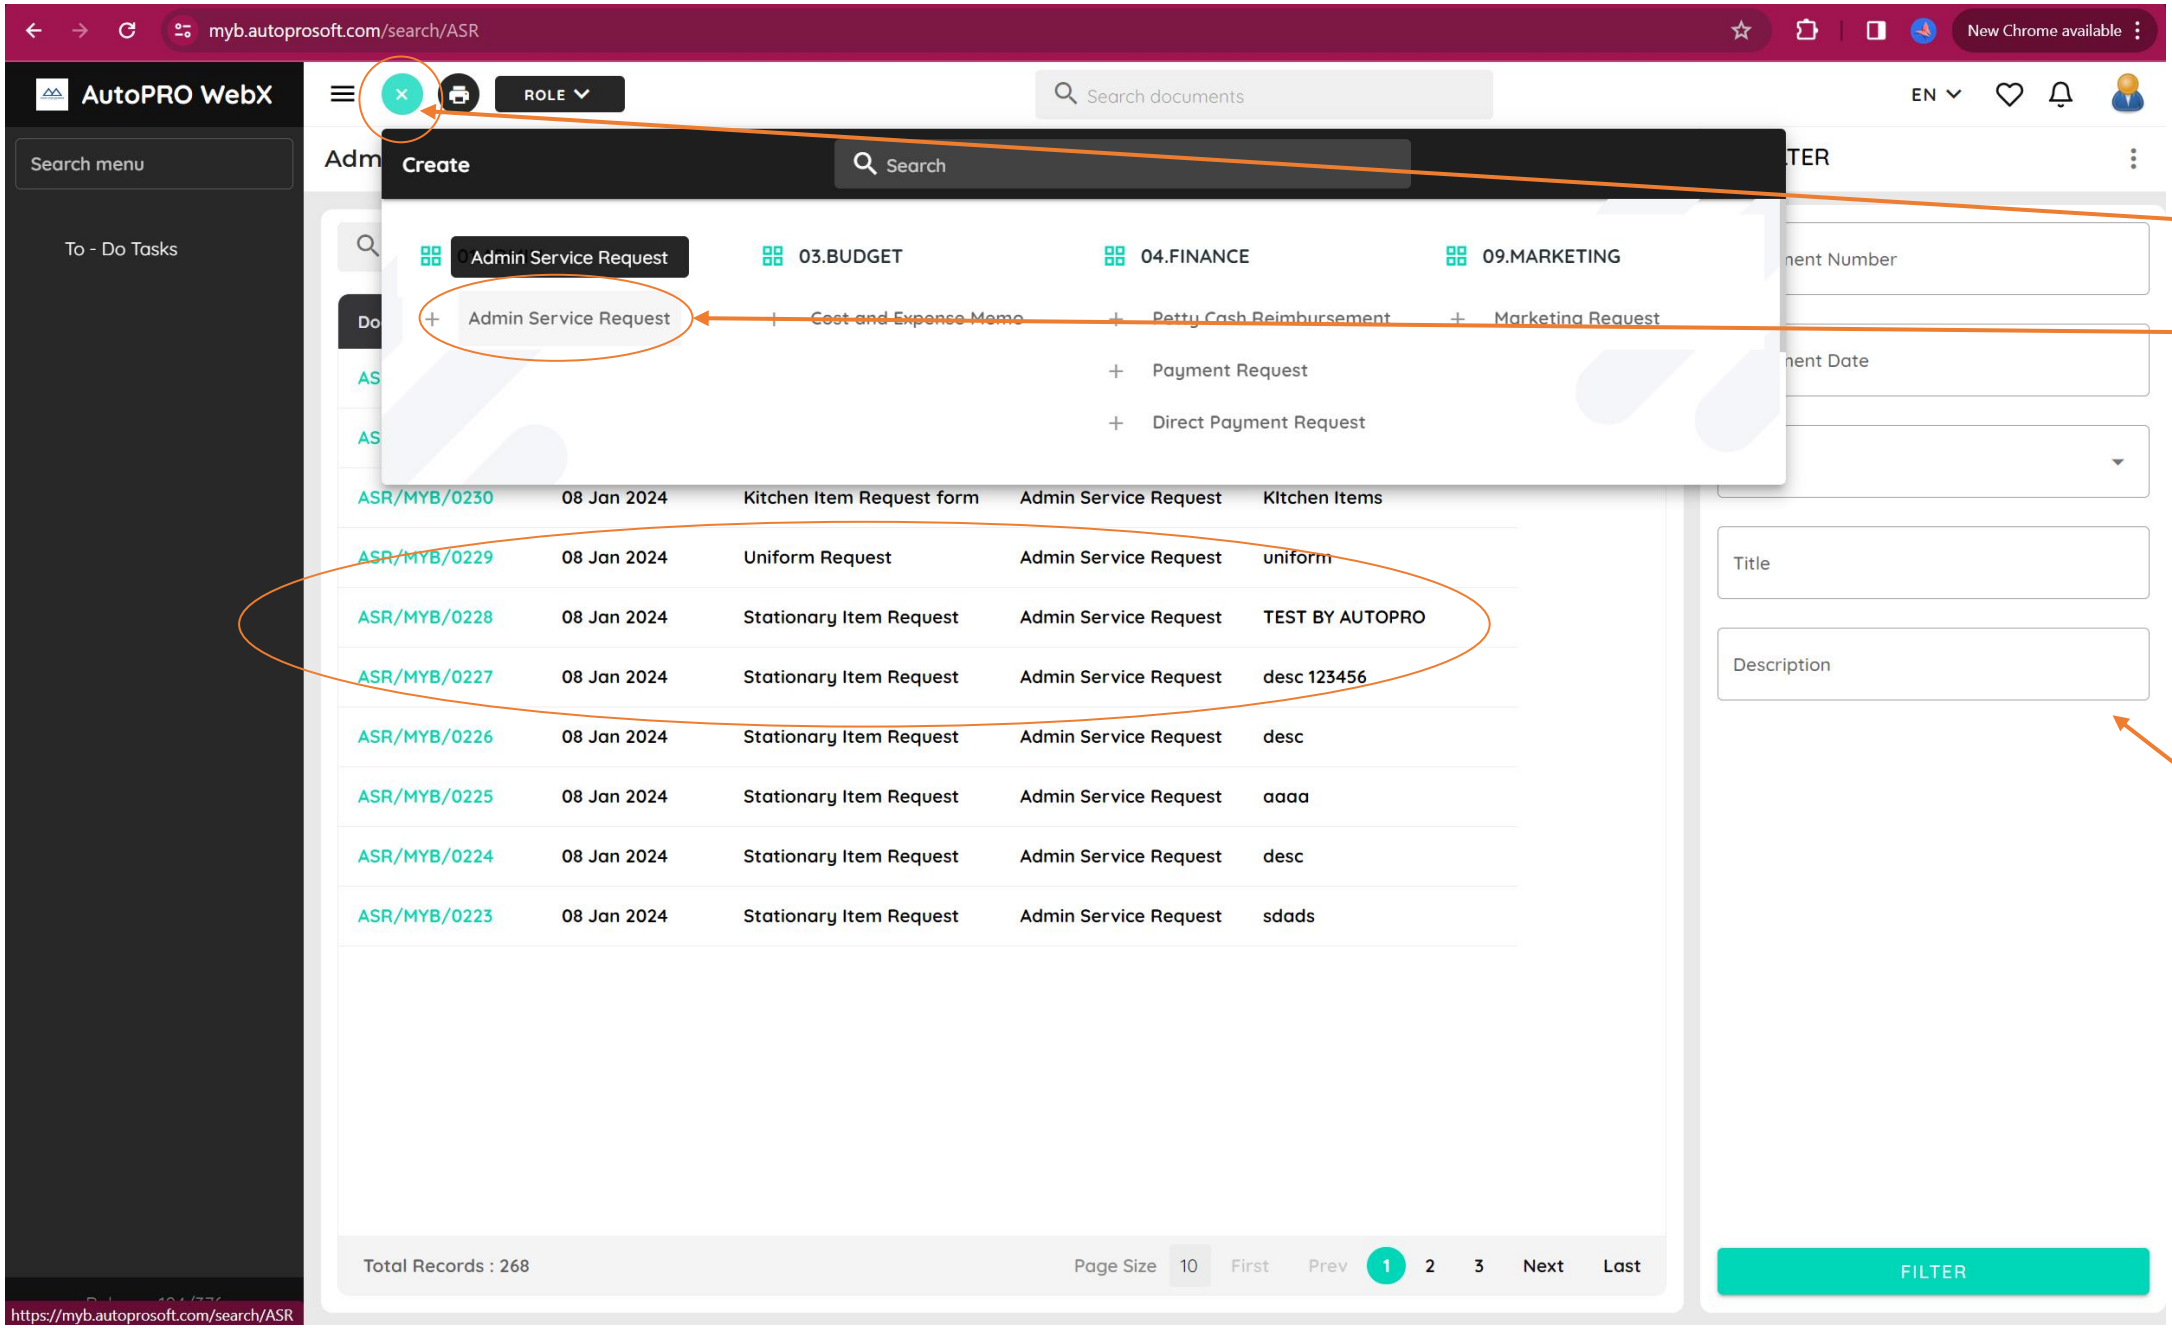

Click on the plus icon on top to access all menus

Click on this plus to create a new document

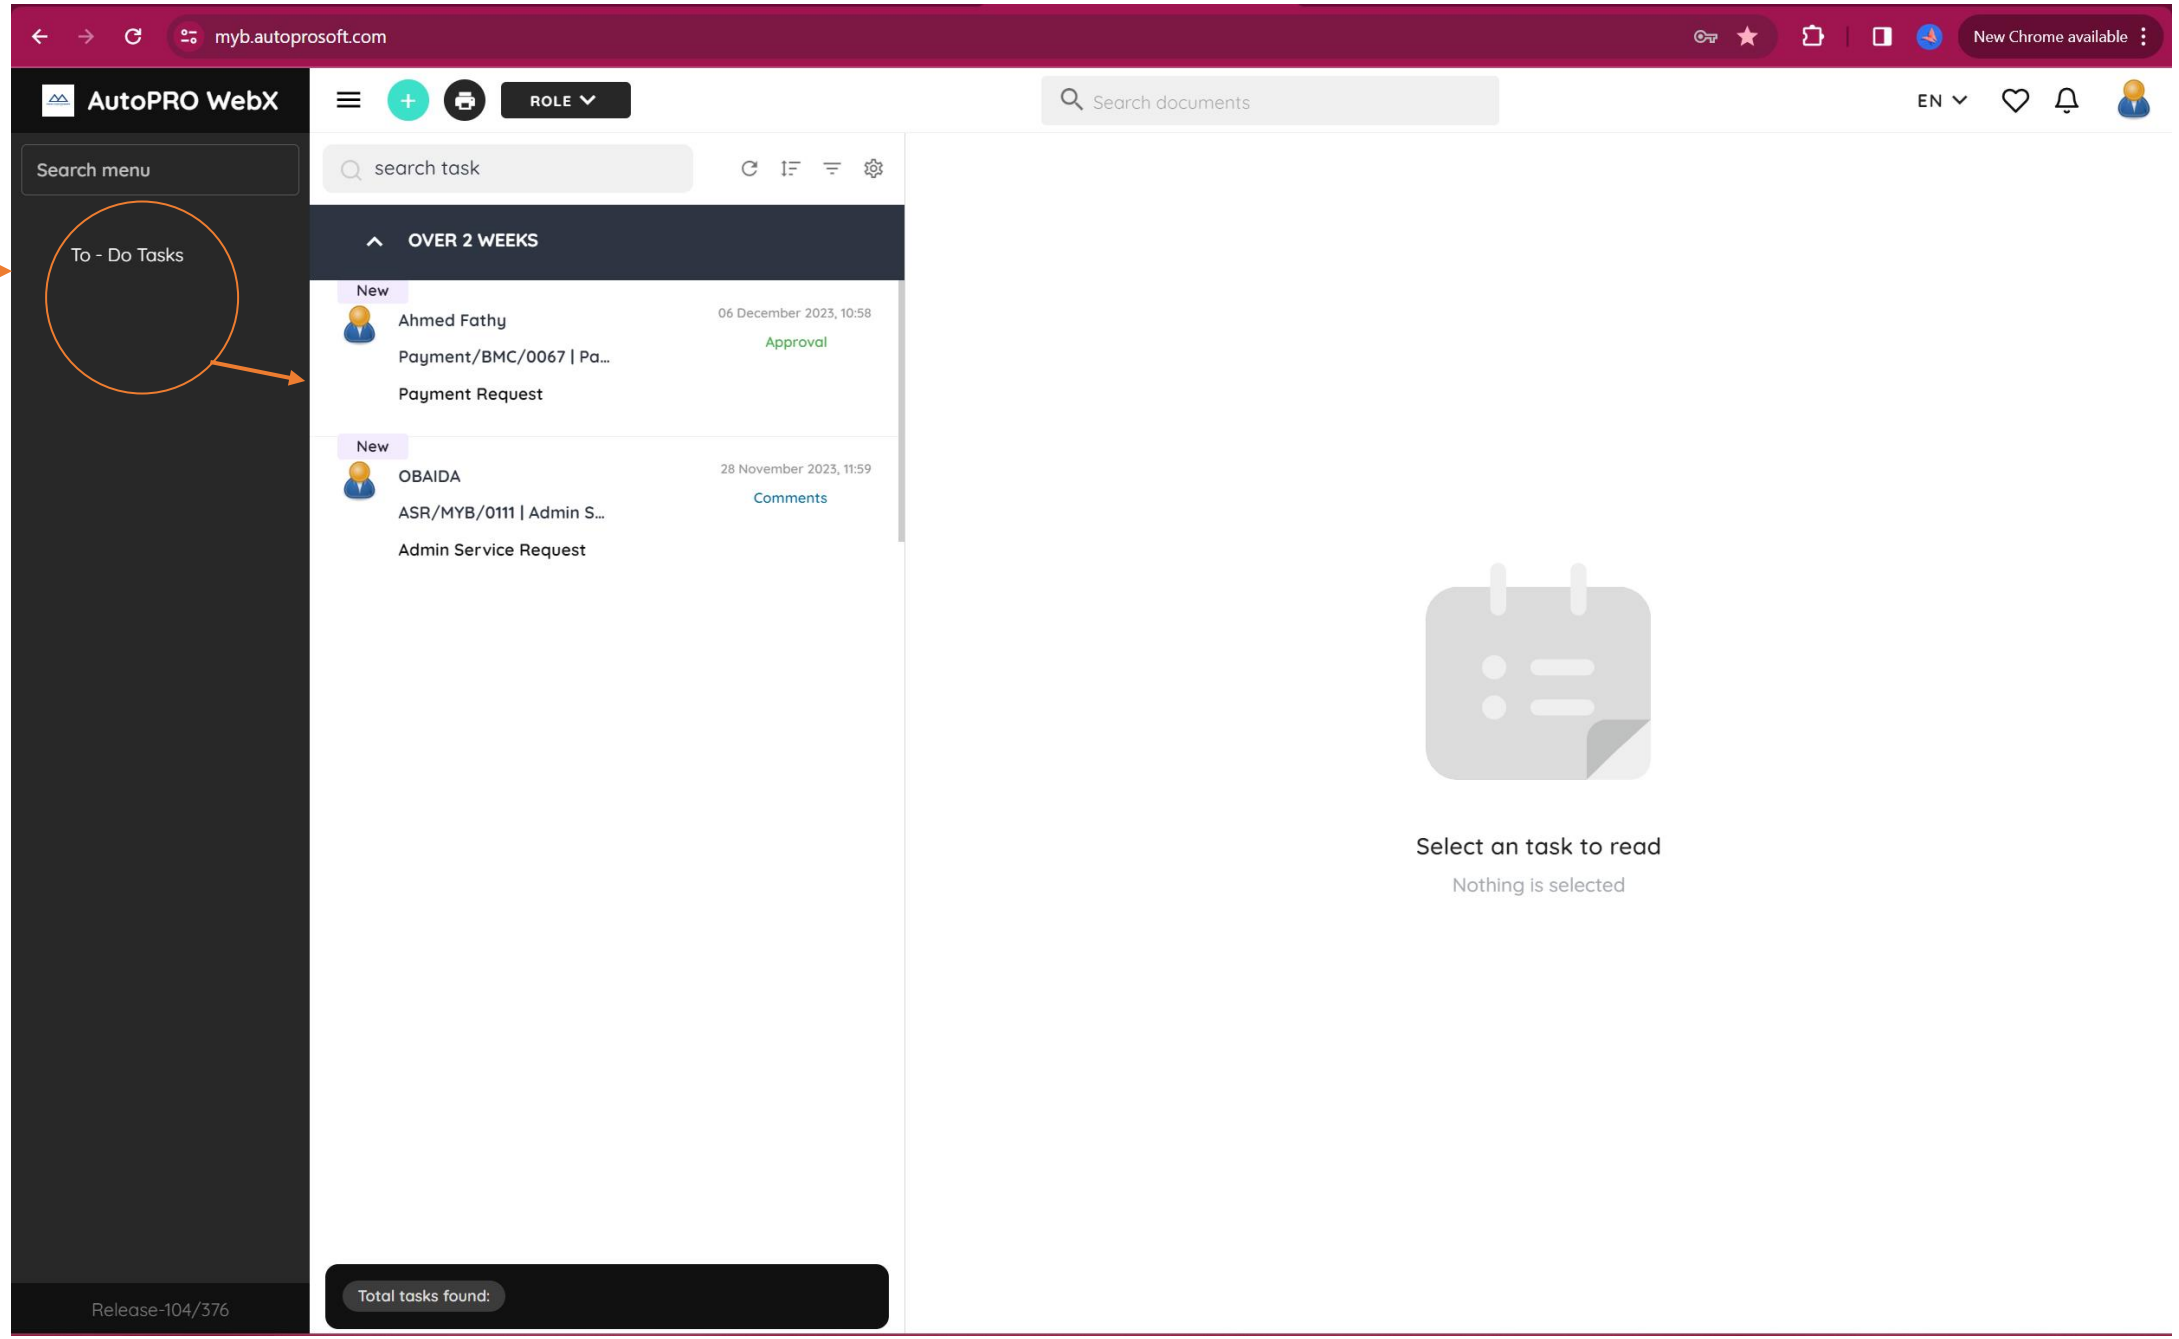

This is where you can add in the required fields to create a document

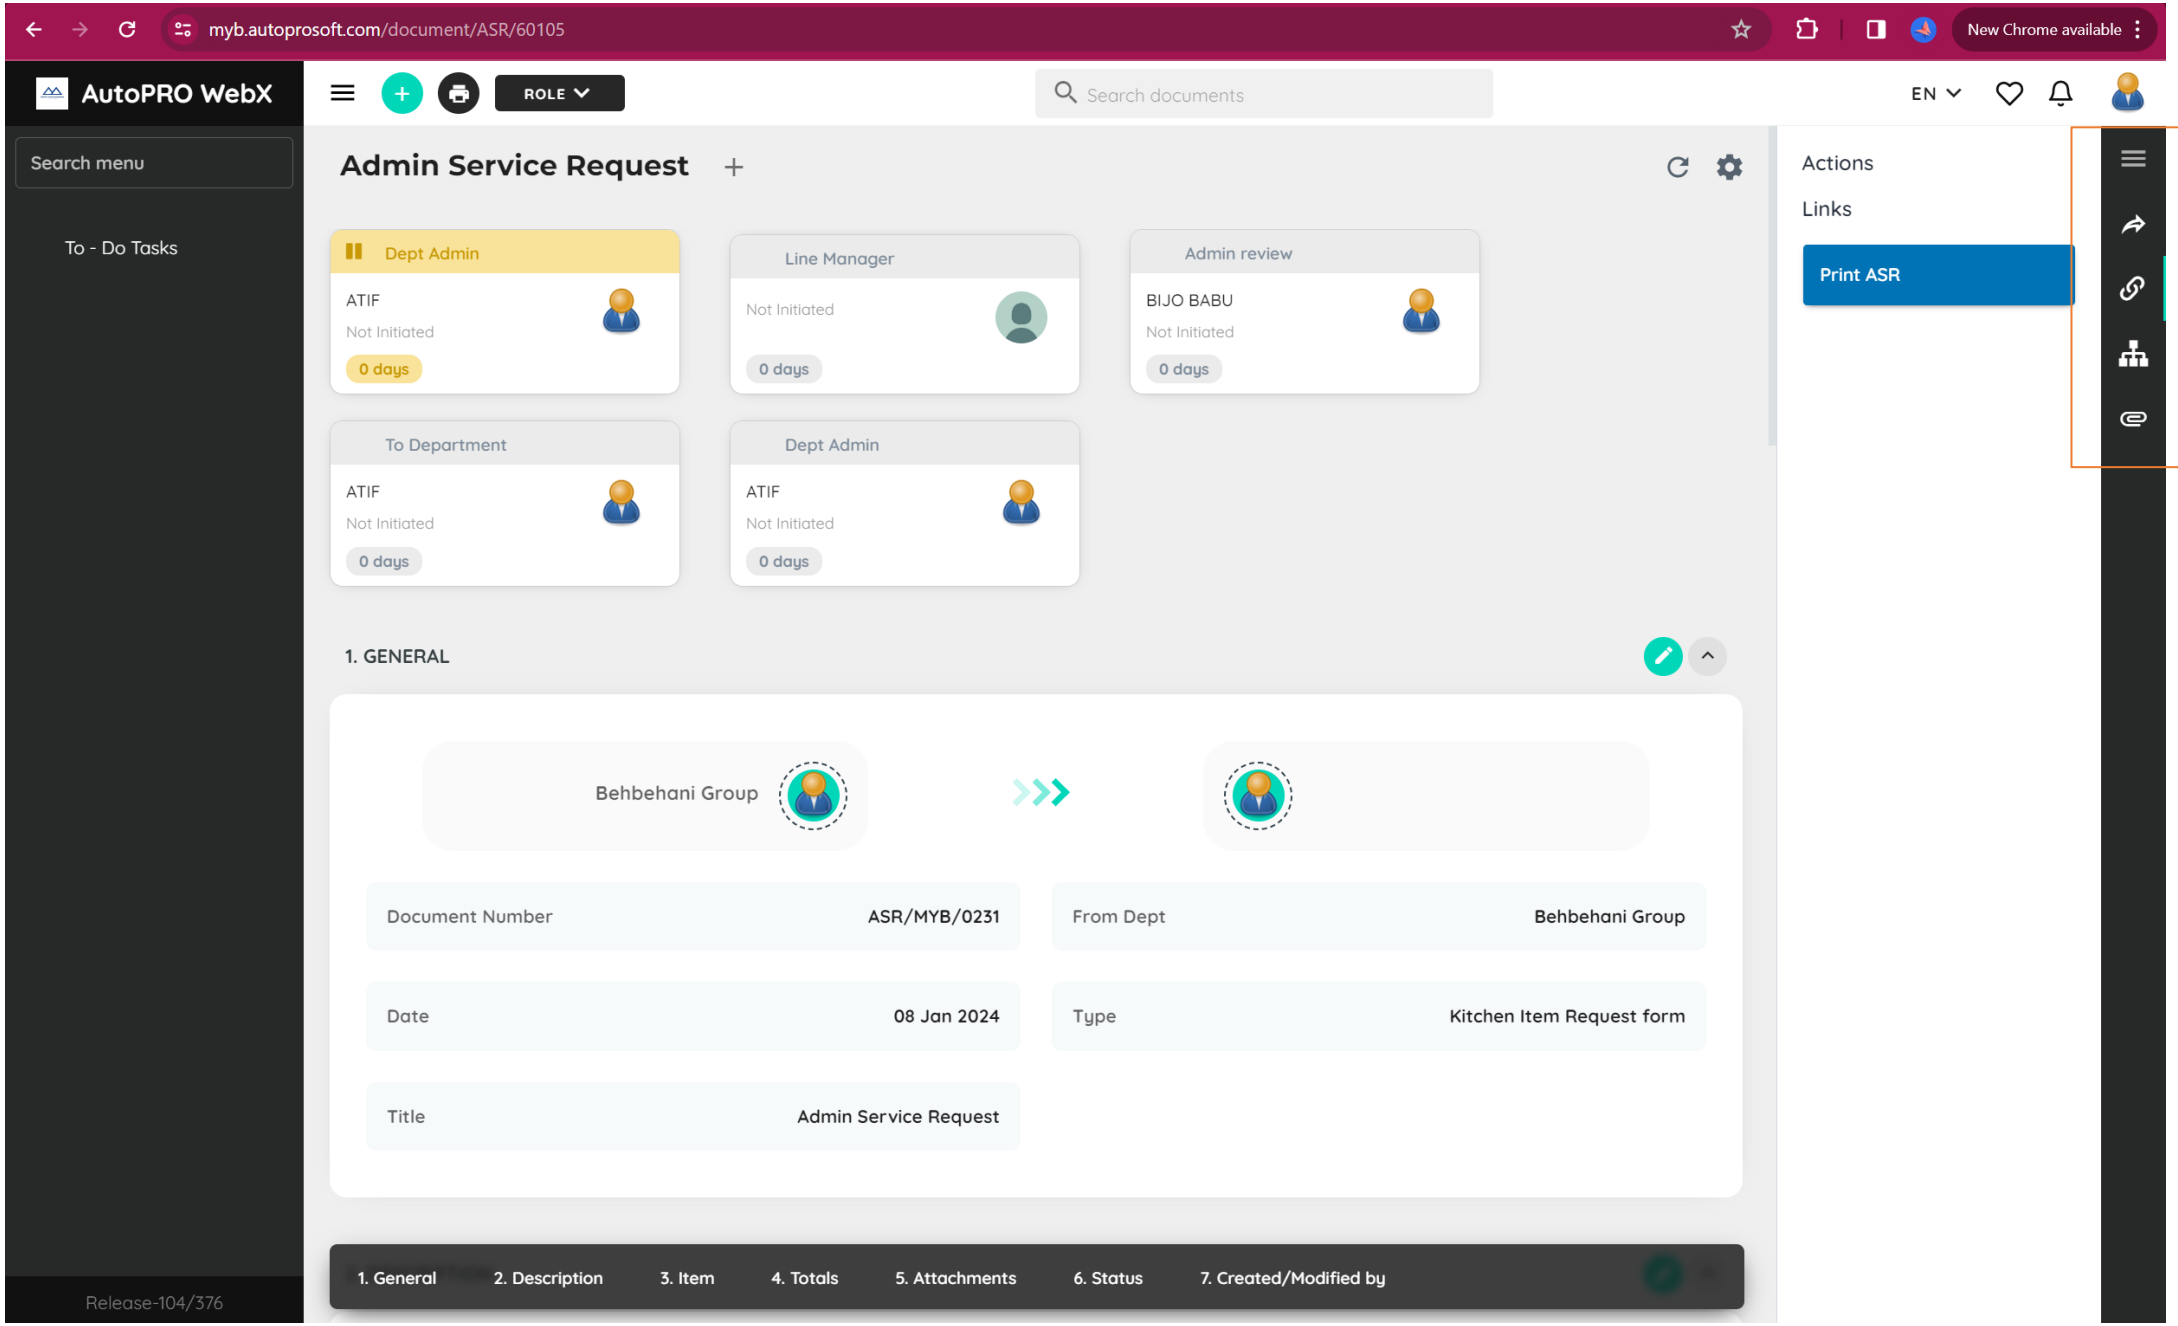

To search for documents, click on the menu- then the document and you will see the list of documents. You can even choose to filter it with the filter option on the right

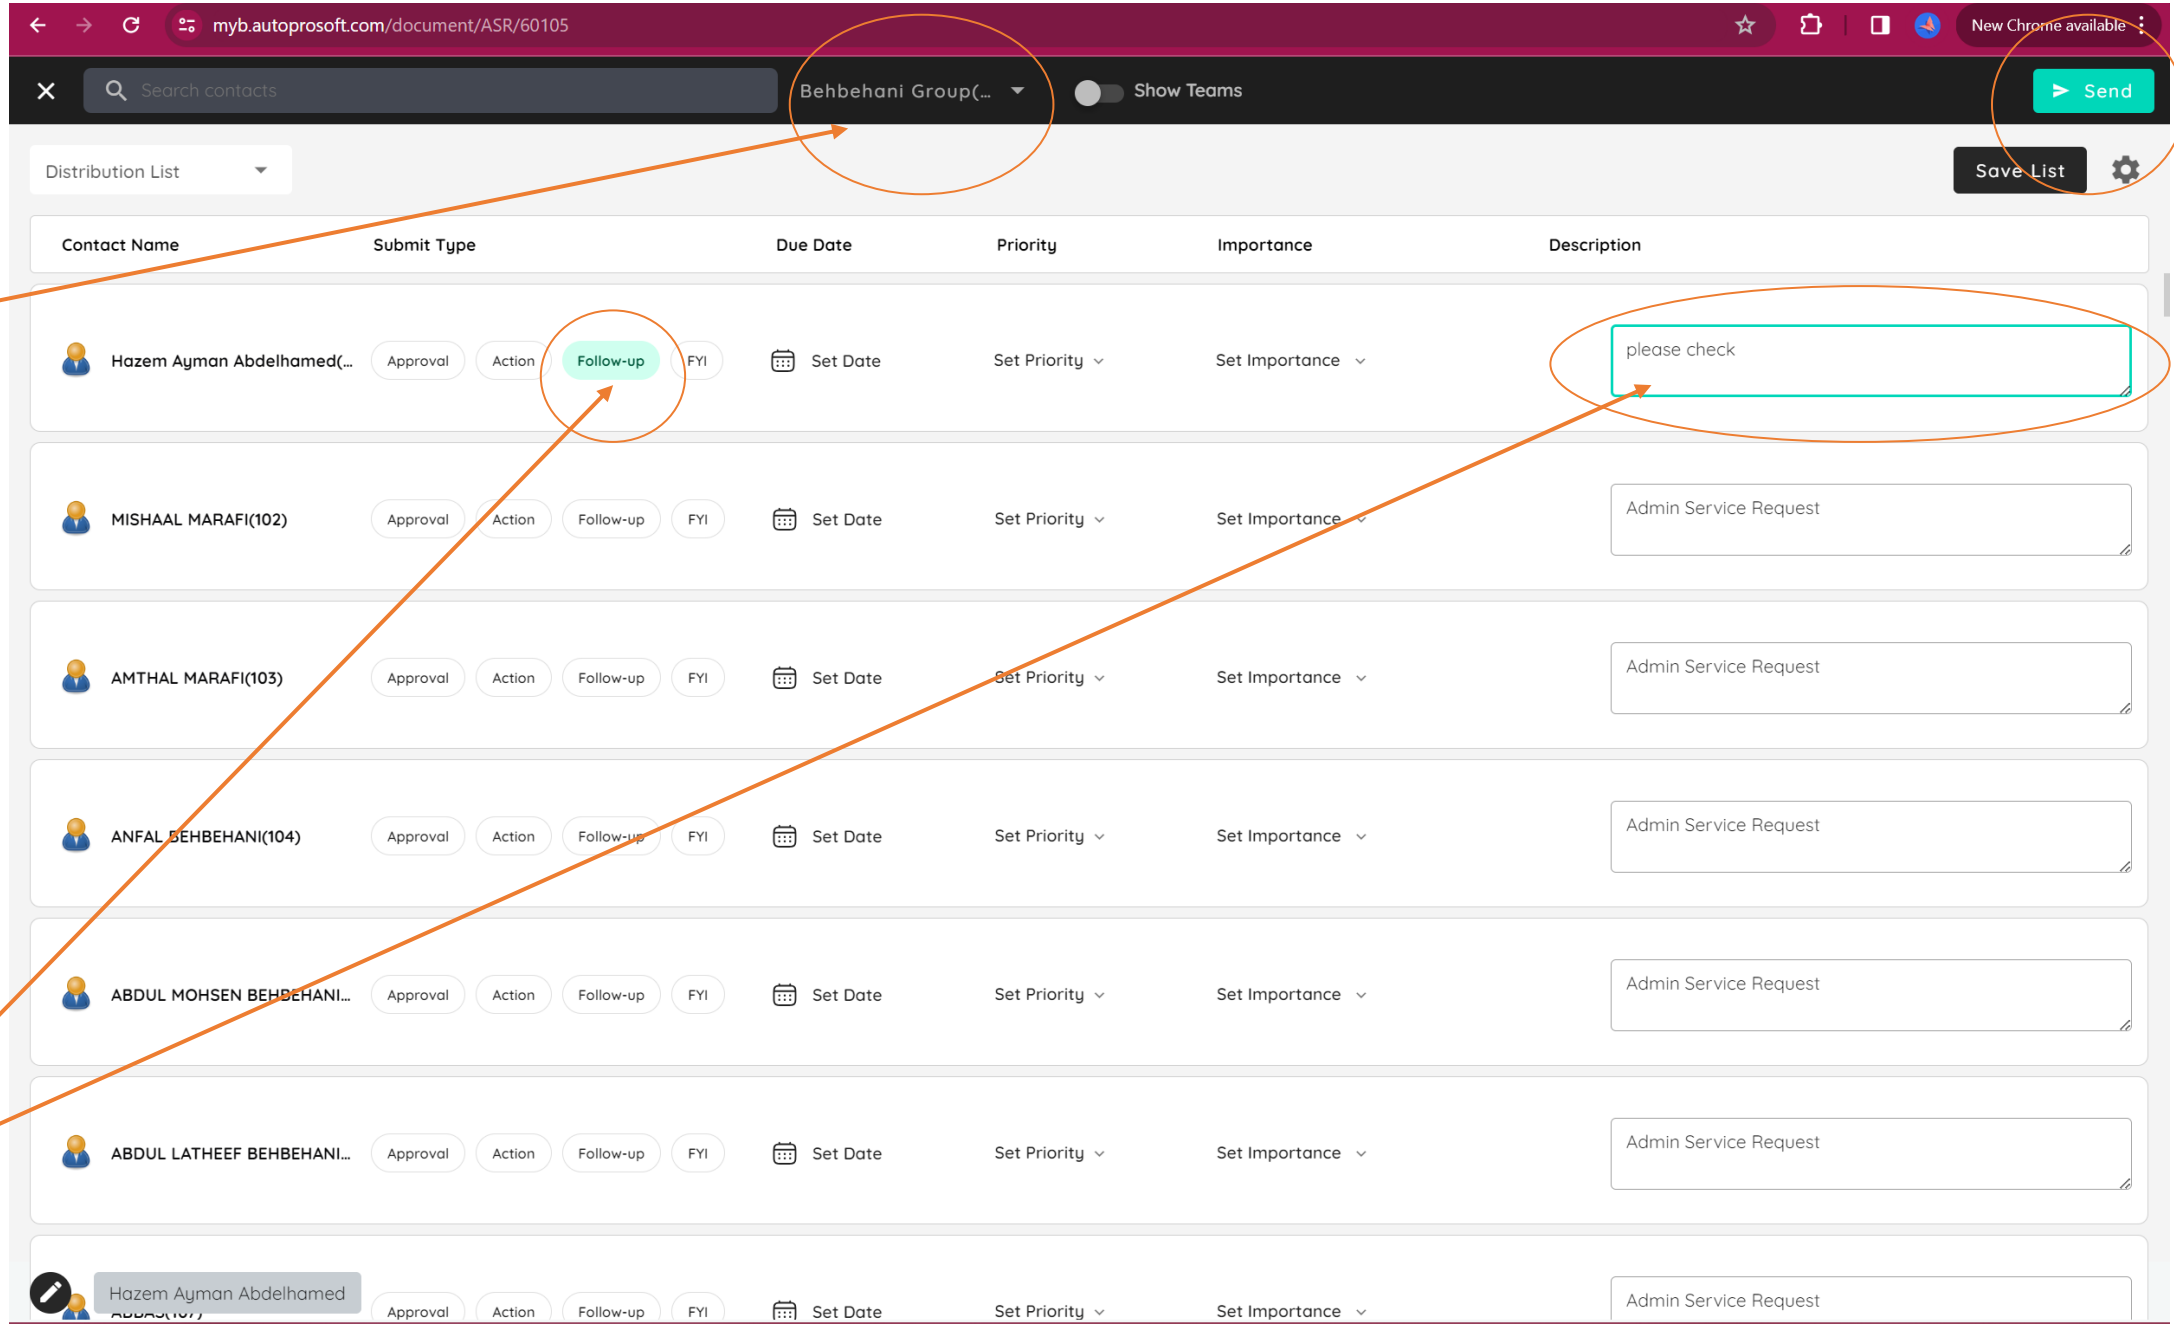

To check day to day tasks received, click on To – Do Tasks

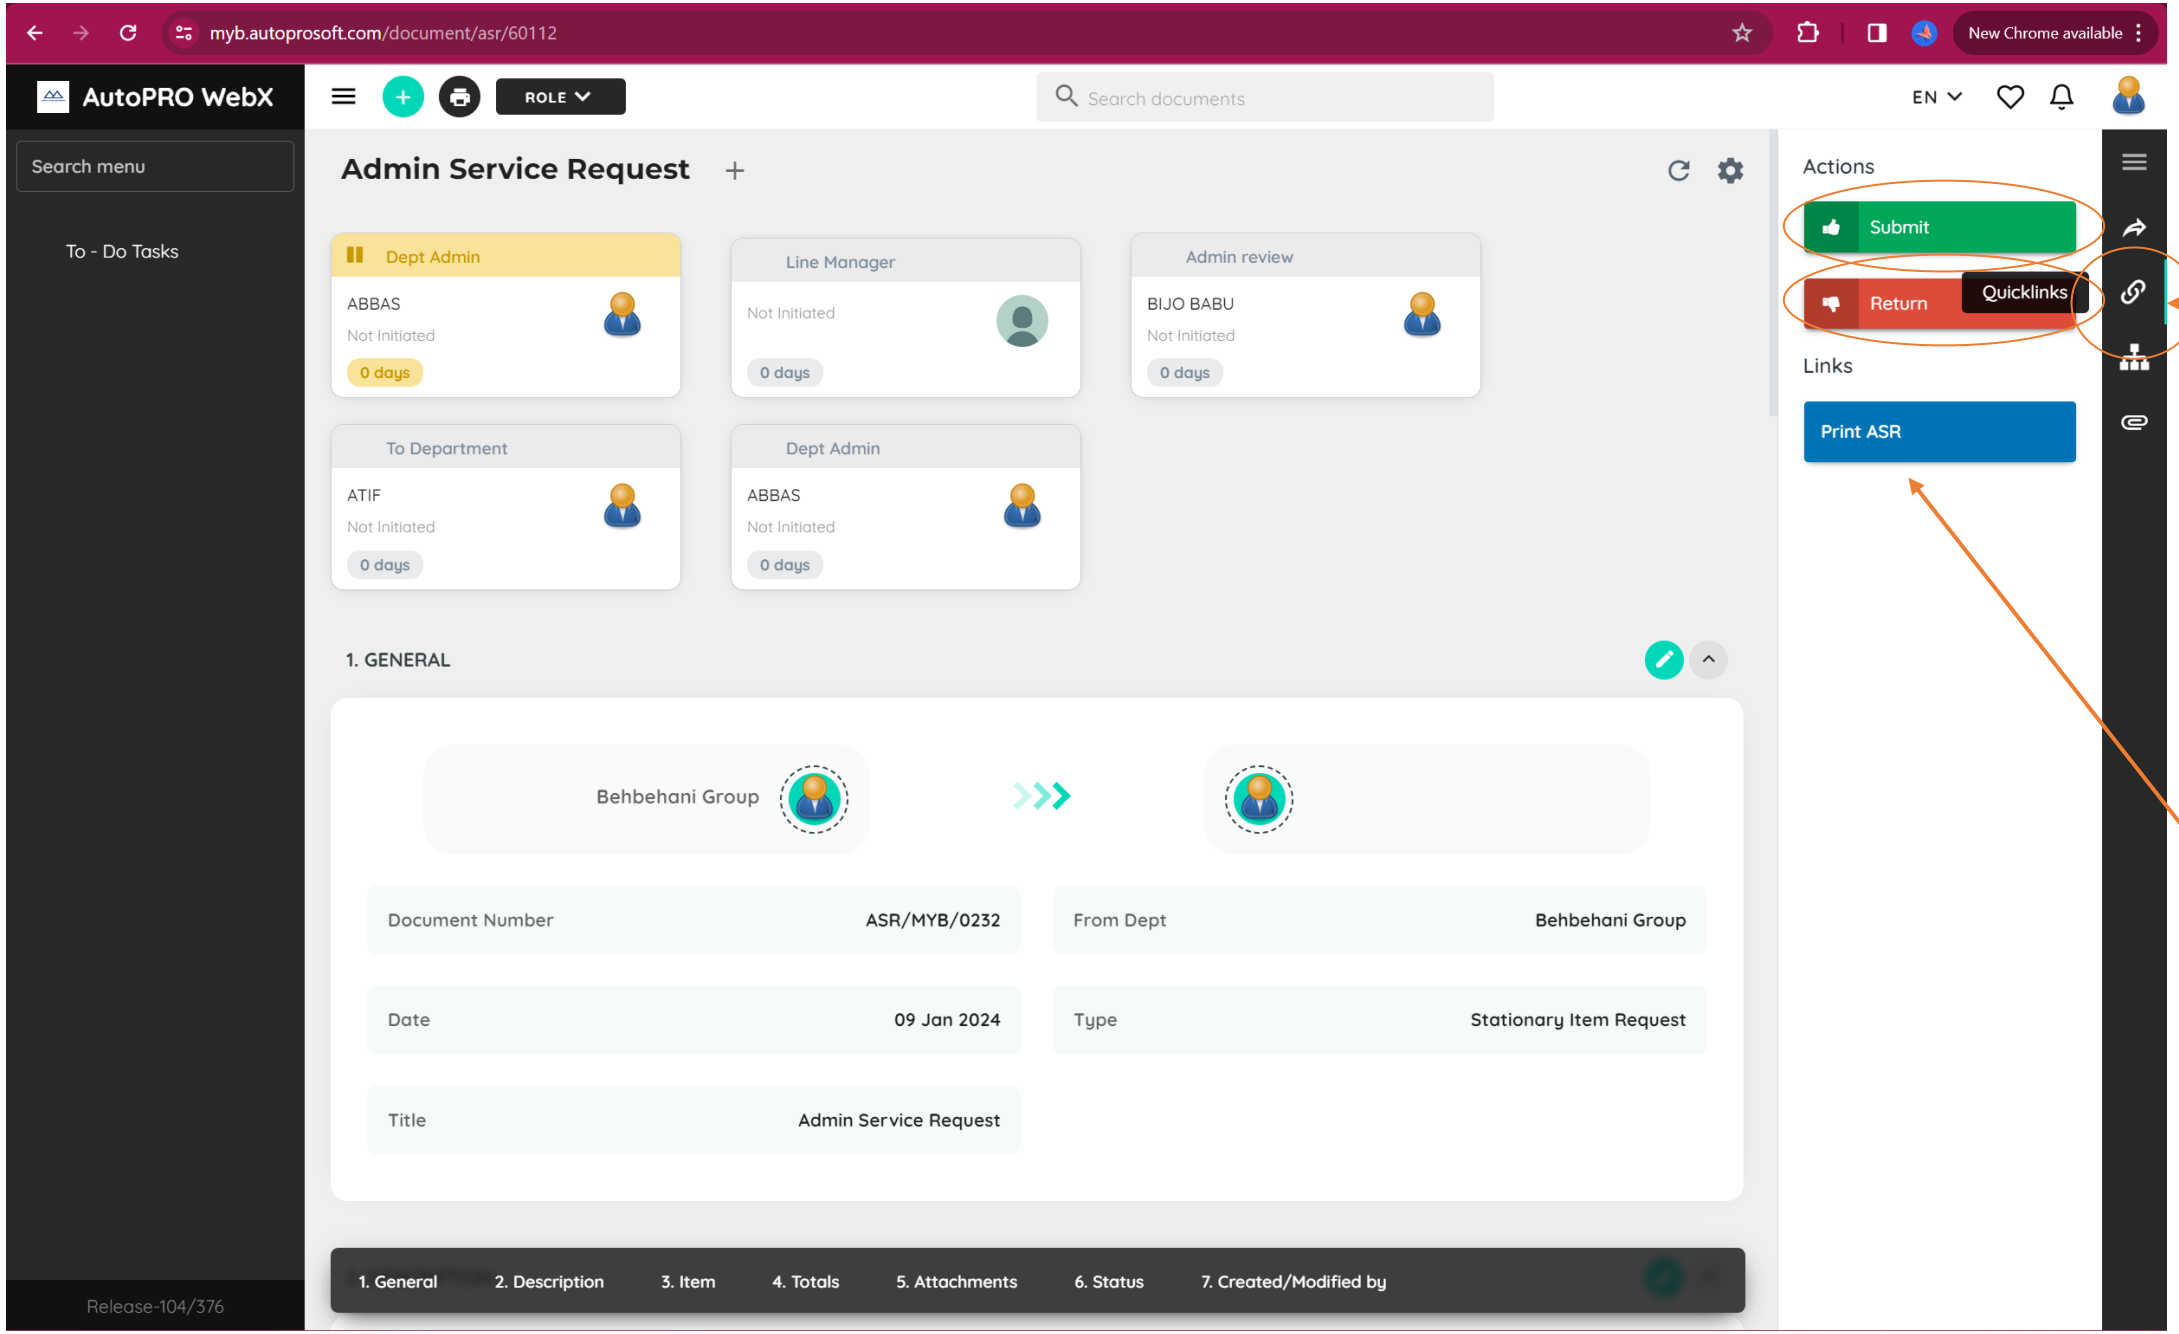

Once you open the document, on the right side you can see a menu panel. The buttons are forward, quick links, workflow and attachments

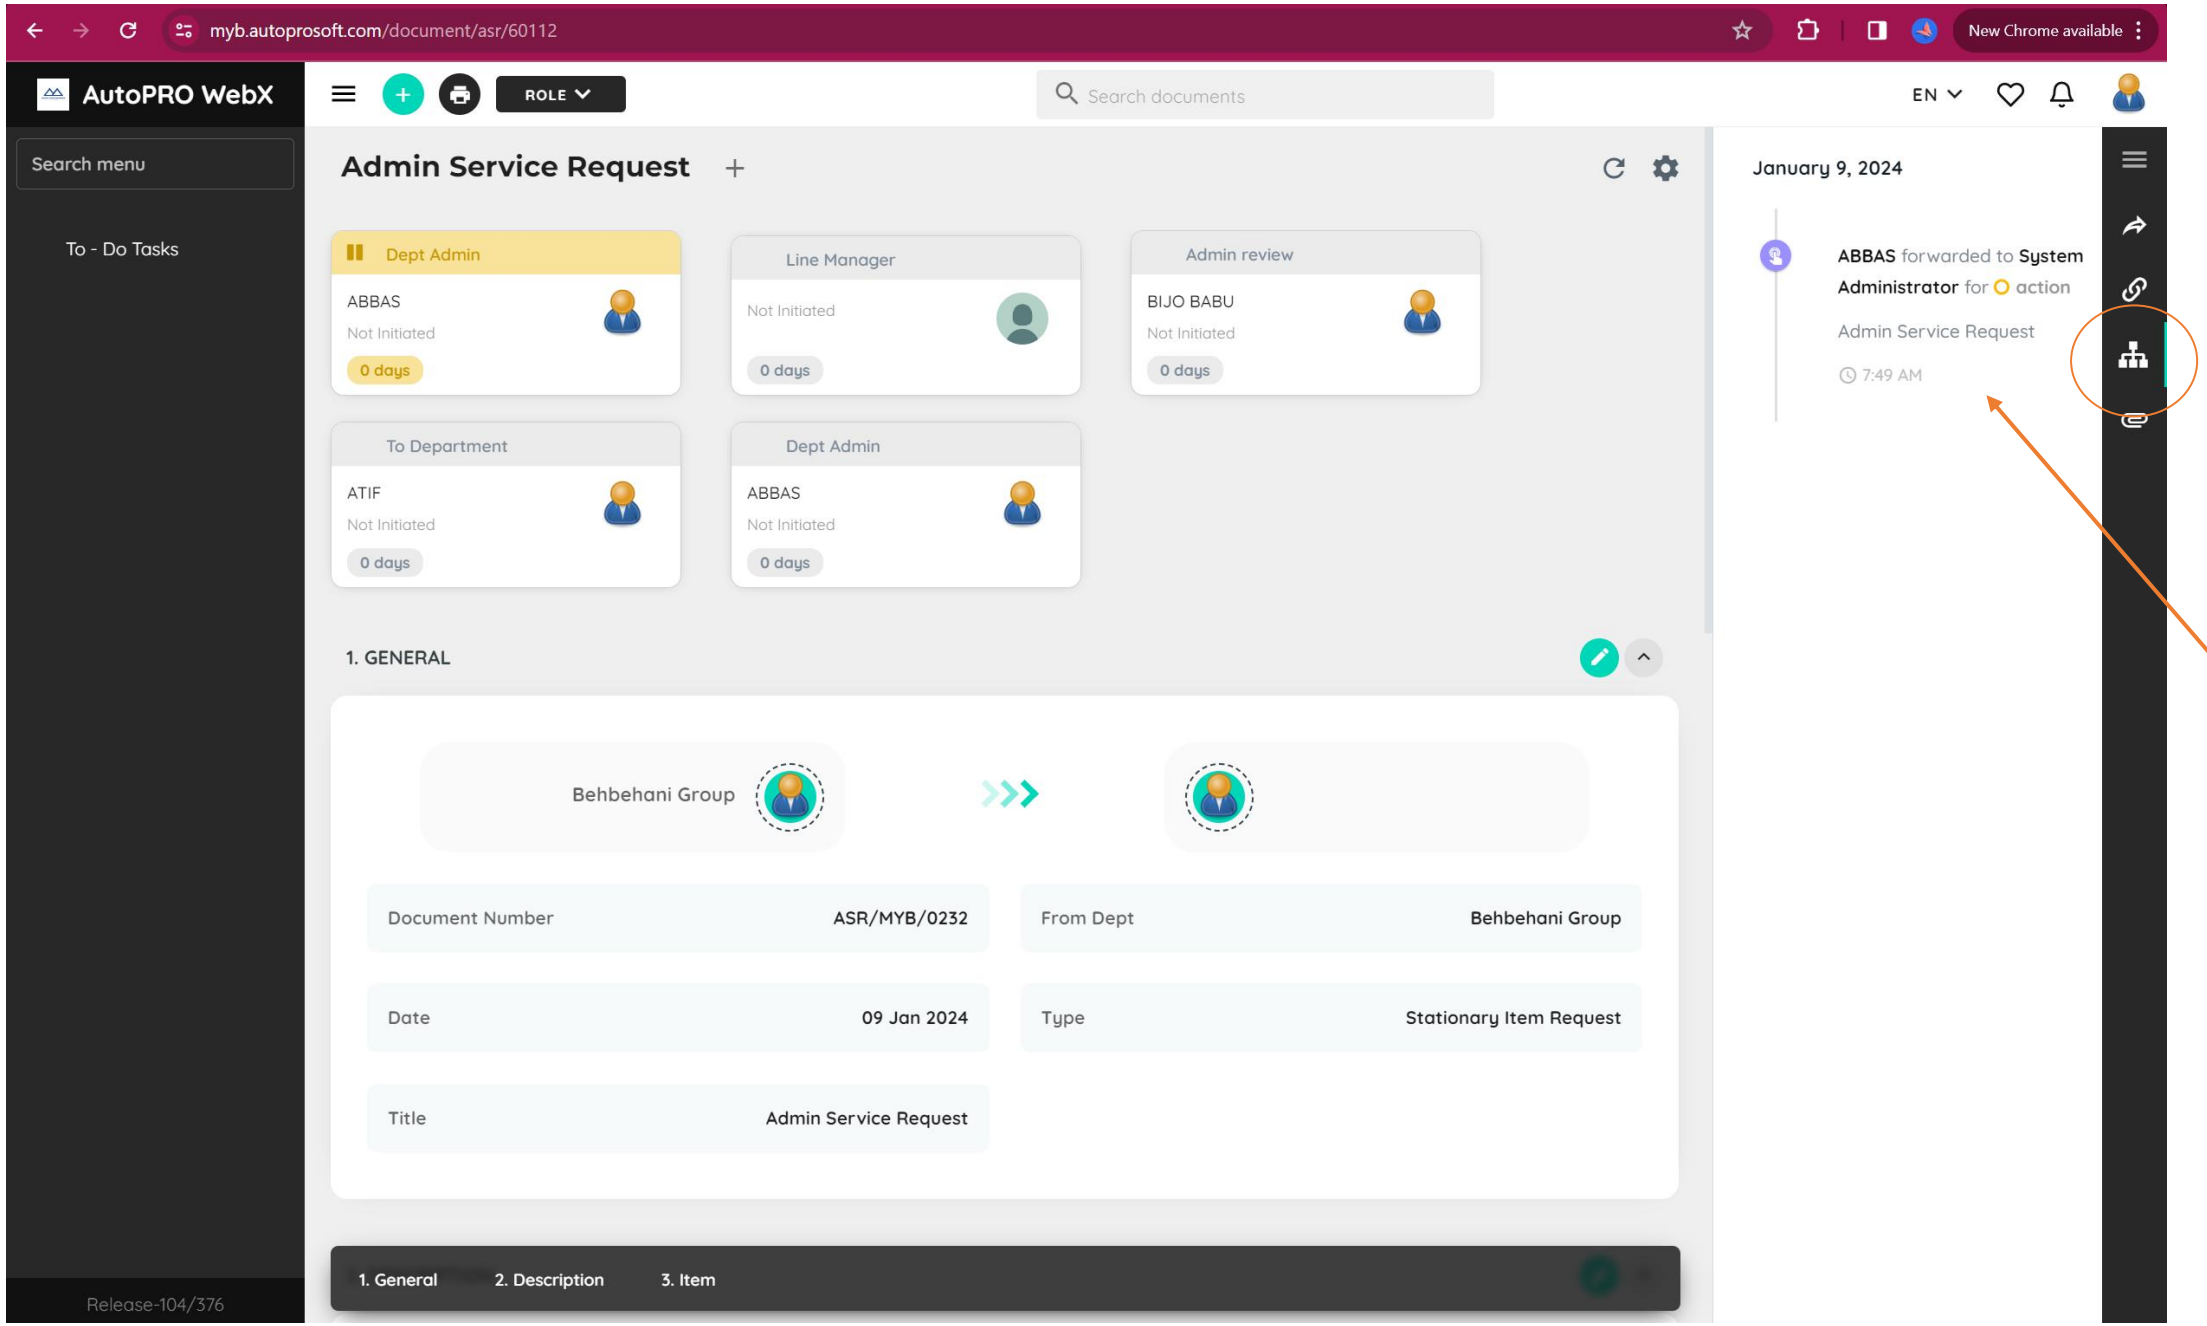

Once you click on forward, tap on the dropdown highlighted, and select BMC, the list of all BMC users will feature. You can choose who you need to forward the document to with an action and comment and click send

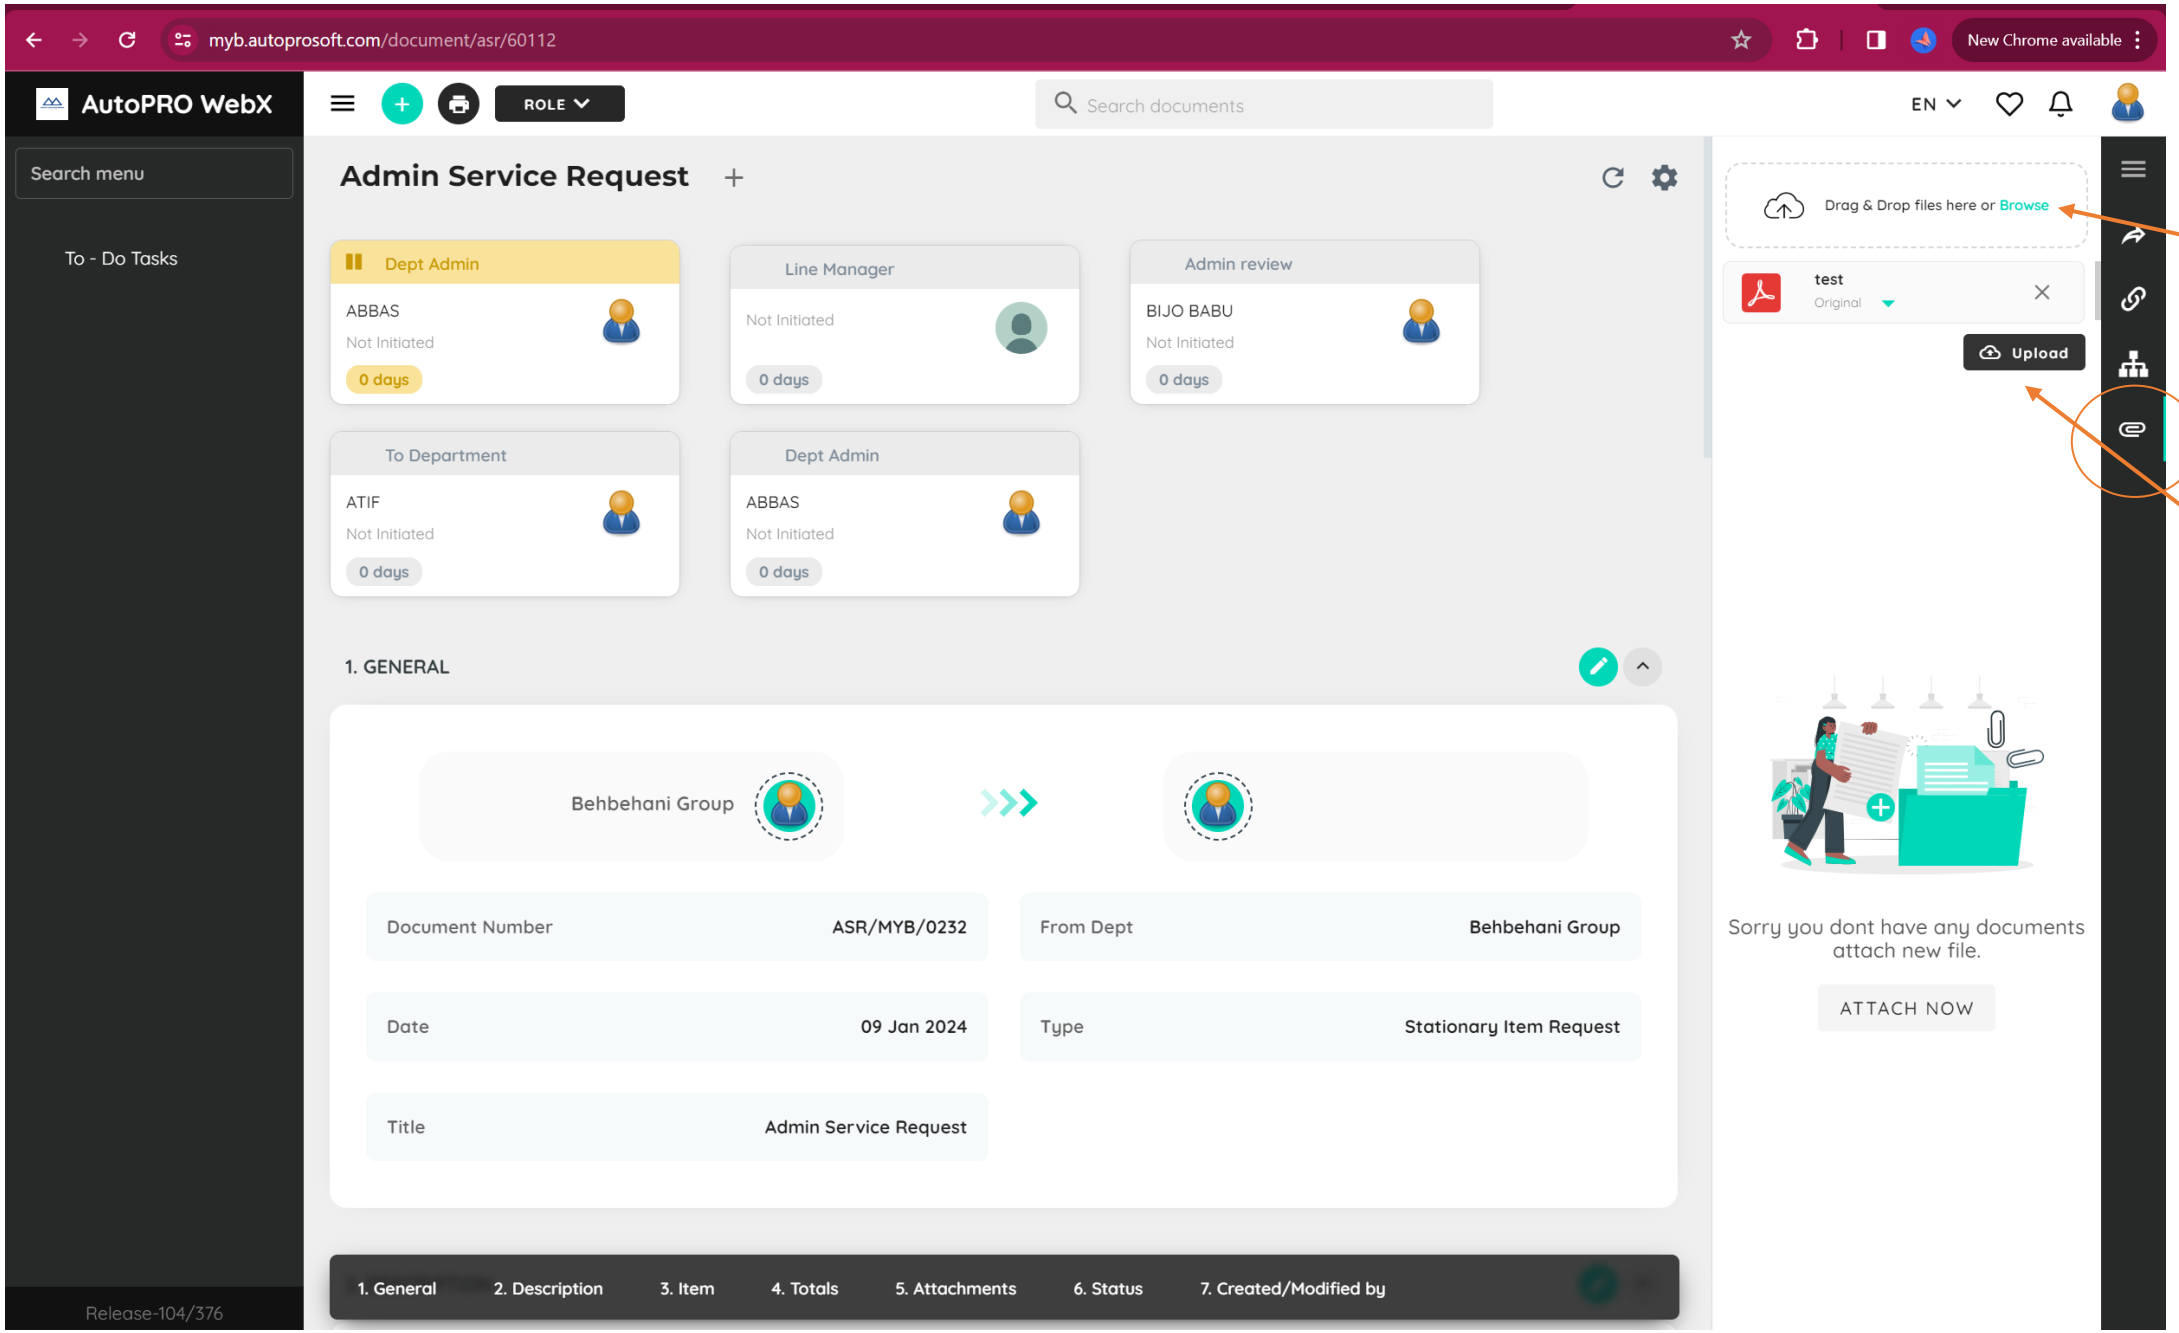

Quick links will show you the workflow action buttons to submit/ return.

You can also view the print preview incase one needs to print it.

The Workflow button helps you to keep a track of the document history. You can check when/ who sent the document

For attachments you can click on browse, select the attachment (word or PDF or a zip file incase of a huge file size) and click upload
